

# A prototype for Process B

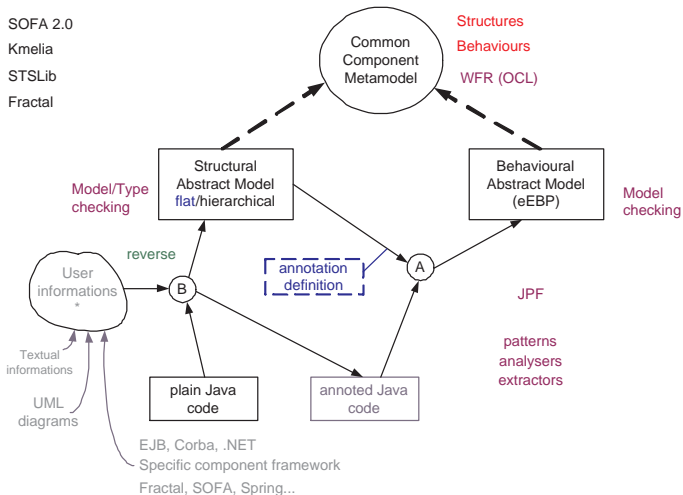

Student project - COLOSS Team

LINA

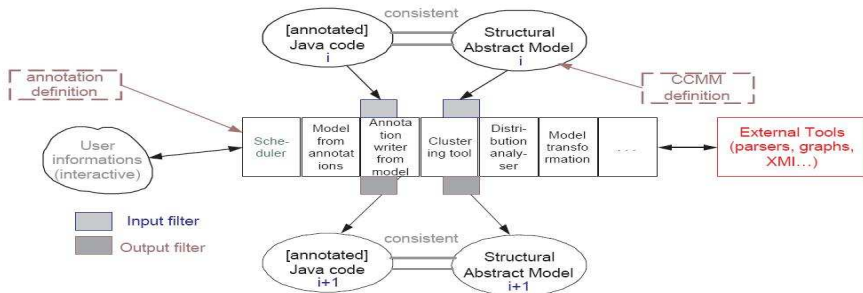

Nantes - May, 13 2008

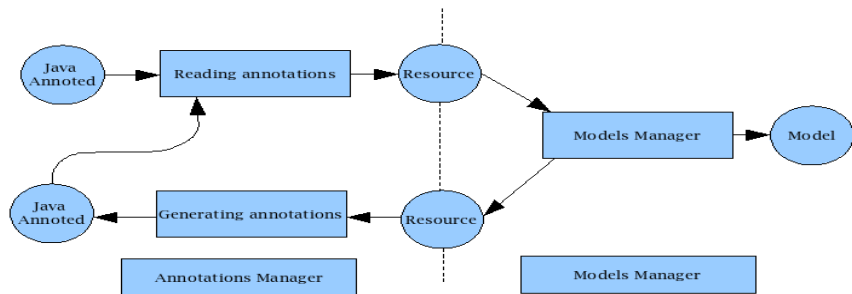

# global architecture

# Iterative Process

# The Student Project

# The Student Project

- Write Java annotations and APT processing
- Write yet another version of a CCMM ;-): CCM\_Architecture.ecore
- Instantiate a Model from the Annotated Java code
- Generate Annotated Java Code from the model

# Before the Demo

## What was done before the Demo

- DL eclipse 3.3
- DL EMF
- Copy the CCM\_Architecture.ecore in the workspace
- Add ProjetOp\_1.0.0.jar to eclipse plugins directory

# Demo

# Current Status

- The project is on the econet svn
- Most students are about to be unreachable
- Multi source annotations to be done
- Problems with automatic build
- Code Generation is not working correctly
